

Srdan Uzelac

Wellsite Geologist

SRDAN UZELAC

Personal

Date of birth 11 December 1973.

Address Klare Cetkin 3A/28, Belgrade, Republic of Serbia.

Phone Serbia: +381 64 261 0887

Email usrdjan@gmail.com

Nationality Serbian

Summary

Years in Industry Oil Industry Experience from 2002. Wellsite Geologist since 2008.

International Experience Angola, Cameroon, Denmark North Sea, Ivory Coast, Kazakhstan, Mozambique, Qatar, Tunisia, UK North Sea.

Well Types Vertical, deviated, horizontal, HPHT.

Drilling Environments Onshore, offshore, deep water.

Geological Environments Clastic, carbonate, halite, anhydrite.

Reporting Daily reports, final well reports.

Supervision Supervision of wireline logging, LWD and mudlogging.

Interpretation Drilling and geological data acquisition, pore pressure analysis, gas analysis, LWD/MWD, wireline, coring descriptions and supervision.

Mentoring Supervision of Maersk trainee Wellsite Geologists.

Industry Experience

May 2021 – Current
Qatar

Wellsite Geologist for **NOC**, Extended reach, horizontal Geosteered wells. Carbonate reservoir, Al Shaheen field.

Sept – Oct 2019

Denmark

Wellsite Geologist for **Hess**, on the Jill-1.

Sept 2014 – Feb 2016

Denmark

Wellsite Geologist for **Hess**. On the South Arne field, UBD /MPD sub horizontal development well, used MWD tools into chalk inter bedded with chert and claystone stringers, all wellsite geology duties including picking the top and bottom of formations by pressure tests to TD the well.

May – Aug 2014

Cameroon

Wellsite Geologist for **Glencore** on the Oak North 1a well composite log and final well report in the office in Douala, analysis lithology claystone with sandstone stringers with log data.

Feb – April 2014

Qatar

Wellsite Geologist for **Maersk** in Qatar on B location, Al-Jassra Gulf, horizontal geosteered carbonate well offshore, wireline and MWD tools, Coring, 6 core runs out of 14, Final well report, daily report, core chips descriptions, Lower Khatiyah limestones and dolomites, Mauddud limestones and marls. Final well report, daily reports, coring reports, LWD logs and wireline assistance (logging witness on board). Pilot hole for coring, before the geosteering sub-horizontal section. Mentoring MAERSK MITAS.

Sept 2011 Dec 2013

Angola

Wellsite Geologist for **Maersk** on Block 23, exploration wells in deepwater, wireline & MWD tools, into limestone, claystone, halite, marl, dolomite, chert, siltstone, responsibilities included logging operations witness, MWD interpretation and evaluation, core point determination and coring 30m conglomeratic sands with in the 319 Oligocene channel sands, casing point determination below the Loeme Salt section, kick and pressure evaluation since high pressure reservoir section below the Loeme Salt, night and day wellsite geologist, Geoservices mudlogging and Baker Inteq for MWD, Baker Atlas for wireline logging, wireline logging witness. Mentoring trainee wellsite geologists from Maersk and Sonangol.

April 2013

Denmark

Wellsite Geologist for **Maersk** on HBB-3A horizontal chalk well.

2007 – 2011

UK NS

Wellsite Geologist for **CNR** on the UK North Sea and offshore Ivory Coast on development wells.

Wellsite Geologist for **Chryssoar** on an exploration well in the UK sector.

Wellsite Geologist for **Apache** on a UK development well.

2002 – 2007

Datalog Technology

Data Engineer / Unit Manager Real time monitoring of drilling process and providing assistance in Well Control and Drilling Optimization. Real time data acquisition, database management and utilization of various software packages. Hydrocarbon gas detection, interpretation and Geohazard analysis. Formation Pressure analysis and evaluation. Log generation and interpretation; generation of daily reports and Final Well Reports. The Mud logging unit running and installation i.e. sensors and gas equipment installations, calibrations, maintenance and troubleshooting. Supervision of the cuttings sampling and examination.

Mud Logging Geologist. Responsible for collection, examination and lithological description of drilled cutting samples, preparation of lithology logs.

Competencies

High Pressure	With Maersk & Marathon.
High Temperature	Overpressure log, Fingerprinting well.
HPHT (Combined)	Good experience of HTHP drilling practices, procedures, kicks, pore pressure trends etc. and monitoring gas levels.
H2S Environments	Kazakhstan (Chevron, Tengiz field).
High Angle Wells	North Sea – Ninian, Murchison fields.
Extended Reach Wells	Several wells in the North Sea sector - Ninian, Murchison fields including Brent slumps, Brae field, Al Shaheen Qatar.
Horizontal Wells	Apache, CNR, Maersk, North Oil Company.
CMR/MRIL, MWD / Wireline / MDT	MREX (Baker Atlas). OnTrak, LithoTrak, MagTrak, StarTrak, AutoTrak, TesTrak, SoundTrak. SLB, MREX, ZDL, RCI, pressure points. CBIL, STAR, EcoScope, TeleScope, MicroScope, StethoScope, Vortex.
Imaging Logs (witnessed)	CBIL (Baker Atlas), EI (Baker Atlas).
Deepwater Drilling	Maersk, CNR.
Engineering	Advanced knowledge of drilling operations.
Reporting	Preparation of morning geological reports, EOWR, Lithologs, supplying client data etc. on a regular basis via e mail or secure server, ad-hoc reports, as specified by client.
Software	Gravitas/ Winlog, GEO, StarSteer.
Other Relevant Skills	Hydraulics, Well control, Pore pressure evaluation, Geosteering.

Courses

Organisation	Course Title	Attendance Date
HRH	Formation Evaluation	Jan 2008
HRH	Gravitas	Jan 2008
HRH	Formation Pressure Logging tool physics, Gamma Ray, Resistivity, SP, Sonic Transit Time, Formation Density, FDC, LDL, LDT, Neutron Logs, CNL, SNP, GNT, Sidewall Cores, Formation Pressure, RFT, MDT, Calliper, Wellsite Applications, Wireline – LWD Comparisons. Formation Recognition, Reservoir Characterization, Porosity, Fluid Type, Geosteering, Formation Pressure, Wireline Witnessing and QC. Pre-Well, Drilling and Post Well Responsibilities, HSE, Geological Operations and reporting Wireline and LWD Quick look, Wellsite Supervision and QC. Abnormal Pressure Mechanisms and Generation Quantitative analysis of Pore Fluids. Calculation of Pressure: Terzaghi and Peck, Overburden Gradient, Matrix Stress, Eaton, Equivalent Depth, DcExp. Quantitative Analysis: Background, trip, connection gases, Drilling Parameters, Torque, Overpull, fill, cavings, Shale Density and Factor, Temperature, Formation Fracture Pressure and Mechanisms, LOT, FIT, Calculation of Fracture Pressure, Eaton, Daines.	Jan 2008

Certification

Issuing Authority	Certificate	Valid Until
OPITO	FOET Offshore survival	21 May 2025
OGUK	Medical	3 Aug 2025
OPITO	Vantage 0236172	n/a
WHO	Yellow Fever	25 Feb 2022

Languages

Language	Spoken, Written & Reading
Serbian	Fluent
English	Very good in all three.

Education

Education: MSc Geology, mineral ore exploration, University of Belgrade

2001

Field Experience

Area	Wells	Comment	Client
